For Immediate Release

SHINAGAWA Group: One SHINAGAWA at the 10th Annual ABM Week

Members of SHINAGAWA REFRA, Shinagawa Refratários do Brasil, and Reframax Engenharia S.A. participated in the 10th edition of ABM Week, held in São Paulo, Brazil.

Shinagawa Group members from Japan and Brazil striking the One SHINAGAWA pose

ABM Week is one of Brazil's leading technical and business events for the metallurgy, materials, and mining industries. Organized by the Brazilian Metallurgy, Materials and Mining Association (ABM), the event brings together researchers, engineers, manufacturers, suppliers, and industry leaders from across the iron and steel value chain.

The 10th edition featured 105 exhibiting companies, more than 3,400 participants, and 1,271 technical papers, providing a broad platform for the exchange of technical knowledge, industry insights, and new ideas. Through technical seminars, presentations, exhibitions, and business discussions, ABM Week offers an important opportunity for companies and professionals to connect and explore new technologies and solutions for the industry.

For the Shinagawa Refra Group, participation in ABM Week provided an opportunity to strengthen relationships with customers and partners, share the technical expertise of its global team, and gain a deeper understanding of the evolving needs and challenges of the Brazilian market.

Various participants from the SHINAGAWA booth

At the event, Shinagawa Refratários do Brasil and Reframax Engenharia S.A. participated, with each company maintaining its own exhibition booth under the Group's PROXIMITY concept. This approach reflects the Group's commitment to working together as One SHINAGAWA, while highlighting the individual expertise and relationships of each company.

Throughout the event, the Group welcomed customers, suppliers, partners, and industry professionals, creating opportunities for meaningful discussions and exchanges. Bringing together expertise across research, engineering, commercial, operations, and finance, demonstrating the diverse capabilities and experience within the Shinagawa Refra Group in Brazil.

Through its combined capabilities in refractories, engineering, and related services, the Group continues to develop comprehensive solutions that address the diverse requirements of customers across the industries it serves.

The Group's participation reflects the One SHINAGAWA approach: bringing together companies, people, experiences, and areas of expertise while respecting the strengths and relationships each brings to the Group. Through PROXIMITY, SHINAGAWA REFRA continues to strengthen collaboration across its global network and work closely with customers and partners to create value and develop solutions for the future.
