For Immediate Release

Strategic Partnership Established with Sheffield Hi-Tech Refractories

We're thrilled to announce that SHINAGAWA and Sheffield Hi-Tech Refractories are joining forces! We've just signed a term sheet to formalize our collaboration to work together and help the global steel industry achieve new levels of safety, performance, and cost efficiency.

This partnership marks another major step forward in our One SHINAGAWA initiative — driving innovation, excellence, and collaboration across borders.

Sheffield Hi-Tech Refractories is a European-based refractory manufacturer, offering state-of-the-art heat-resistant products and solutions for various industries. In particular, their one-of-a-kind STOPFIX is an innovative flow-control system for the steel manufacturing process. This innovative technology improves casting operations, resulting in a safer and more efficient work environment.

Bringing the technological strength of Sheffield Hi-Tech Refractories and Shinagawa's 150 years of experience together to act as one team, we will confidently support and revolutionize the steel industry worldwide.
